SPECIAL NOTES: Polycarbonate and acrylic products were tested on uncoated sheets. Do not use unapproved cleaners or disinfectants on sheet products. Generally speaking soap and water, hydrogen peroxide and isopropyl alcohol-based sanitizers work best as disinfectants on polycarbonate. Disinfectants containing hydroxides, dimethyl benzyl or ethyl ammonium chloride, ethylenediamines and hypochlorite will crack the polycarbonate sheets.

**Because manufacturers sometimes change their formulas without notification compatibility in perpetuity can not be presumed.
