

Shelter Point Hand Sanitizer

At Shelter Point Distillery, we're making use of our experts and facilities to produce an alcohol based hand sanitizer solution, approved for topical use. It has been carefully crafted to follow the strict guidelines of the World Health Organization (WHO). Made with 75% alcohol, it's great for both hands and surfaces.

Helpful Usage Tips

The WHO suggests 3ml per application. Employees will typically use sanitizer up to 8x per day. Customers will use it 2x per visit. A company with 10 employees will go through about 5L per month for their own people. A business that expects 25 customers per day through the door using sanitizer on their way in and out will also use about 5L per month.
